

Gamestay Recovery Crops

Gamestay Revival

Gamestay Revival is best used where rapid establishment is required, such as replacement of a failed crop or as a late establishment option. It contains a balanced mix of fast growing brassicas and can produce useful cover within six to eight weeks. Revival should not be sown too early, it will provide feed and cover well into the winter.

Gamestay Recoup

Gamestay Recoup is a combination of Texel Greens and a specially selected Mustard which shows early vigour against other Mustard varieties as evaluated in our trials. It is best used where rapid establishment of a crop is required, such as replacement of a failed crop or as a late establishment option.
