

STIMULATE

PEARCE
SPORTING SERVICES

A new concept from Marsdens.

FISHMEAL

Use of high quality protein sources.

- High level of bird performance.
- Well balanced amino acid profile, resulting in enhanced immune function and reduced nitrogen excretion.

VITAMIN E AND SELENIUM

Use of natural antioxidants.

- Enhanced defence against disease through increased production of specific antibodies and white blood cells.
- Better natural resistance to Coccidiosis and other intestinal challenges.
- Improved response to stress through moderation of steroid hormone metabolism.
- Increase hatchability and chick viability.

BETAINE

A natural source of Methyl groups.

- Promotes tissue repair and immune function.
- Has osmoregulatory effect, which helps cells retain water under periods of heat stress or protozoal challenge.

OREGIN

Oregano, Ginger and Nutmeg - Essential Oils.

- Effective as antimicrobial, antioxidant and anti-inflammatory compounds, thus assisting the bird's natural immune response.
- Promotes the secretion of digestive enzymes, thus enhancing nutrient utilization.
